

Lube1TM Premium PSF Power Steering Fluid

Lube1TM Premium PSF is a steering fluid that has been specifically designed for all **power-assisted steering**. Through the unique combination of cutting-edge lubrication technologies, it meets or even exceeds all requirements in power-assisted steering.

Description

Lube1TM Premium PSF is suitable for **all** power-assisted steering in cars and light utility vehicles. Through the unique AACP* technology, Lube1TM Premium PSF can be mixed with and added to all conventional steering fluids. Thanks to Lube1TM Premium PSF, every vehicle workshop or garage now only need to keep one steering fluid in stock and need no longer purchase expensive special-purpose oils. This simplifies work and reduces costs.

* Active Additive Compound Package

Use

Depending on the demands of the vehicle, we recommend changing Lube1TM Premium PSF at 80,000 to 100,000 km or after 5 years in order to guarantee long and trouble-free operation even if the vehicle is subject to heavy duty requirements (oil change intervals specified by the manufacturer must be observed!).

With Lube1TM, you will always have the right steering fluid to hand!

Vorteile

- Replaces special oils for power-assisted steering and prevents mix-ups.
- Reduces noise development.
- Cleans and loosens stuck turbines, pumps and valves.
- Stabilises steering response, especially in cold weather.
- Power-assisted steering runs more smoothly.
- Resistant to extreme heat and pressure.
- Prolongs steering life.
- Saves costs for storage and handling.

Technical Data

Colour, visual	Yellow
Density at 20° C kg/m ³	847
Viscosity at 40° C mm ² /s	34.1
Flashpoint (COC)° C	242
Viscosity at 100° C mm ² /s	7.4
Viscosity index	198
Pour point °C	<-51
